1. PUBLIC SECTOR DEBT PORTFOLIO SUMMARY ANALYSIS

ANNEX

General Statement

The Debt Management Office (the "DMO") of the Ministry of Finance is mandated under Section 61 of the Public Debt Management Act, 2021 (the "Act"), to prepare and publish public debt statistical bulletins ("PDSB"), no later than thirty calendar days after the end of each quarter of the fiscal year.

In keeping with this mandate, the March 2022 PDSB represents the third centralized collection of and dedicated publication on public debt statistics in The Bahamas by the DMO.

All correspondence pertaining to the PDSB should be addressed to:

> The Director **Debt Management Office** Ministry of Finance Goodman's Bay P.O. Box N-3017 Nassau, Bahamas Email: dmoinfo@bahamas.gov.bs

Dissemination of timely, consistent, comprehensive, reliable and internationally comparable public debt statistics represents a key element of the Government's commitment to promote accountability and transparency in debt management activities. It also contributes to informed decision making of domestic policy makers for sustainable macroeconomic growth, and is an invaluable source of information for international organizations, investors and other stakeholders who have an interest in the management of public debt in The Bahamas.

Coverage, Sources and Methodology

ω

Ś

ANNEX

The following provides key background information on the coverage, data and reporting scope, methodology and practices useful to understanding the compilation of the public debt statistics presented in the PDSB.

DATA COVERAGE

6

As prescribed in the Act, the content includes:

- » the outstanding stock of all public sector debt;
- the size and currency compo-» sition of the public sector debt;
- the interest rate mix of the public sector debt and
- the maturity profile of the pub-» lic sector debt.

INSTITUTIONAL COVERAGE

For the purposes of this reporting, public sector debt includes the debt of the central Government, Agencies and covered Government Business Enterprises ("GBE")—as defined in the Public Financial Management Act, 2021 and included in the **Glossary** to the PDSB.

PERIODICITY

The PDSB will be published quarterly (fiscal quarters ending September, December, March and June) as at end October, January, April and July, respectively.

DATA SOURCE

The source of the debt data is the public sector debt statistics compiled in the Commonwealth Secretariat (ComSec) Meridian-a debt recording and analysis programme, administered jointly by the Ministry of Finance and the Central Bank of The Bahamas. Comprehensive records are maintained of all central Government loans, disbursements, debt service and guarantees, along with the equivalent monthly debt data collected from reporting Agencies and GBEs.

CURRENCY OF REPORTING

For debt contracted in different currencies, stock data, (e.g., debt outstanding), are converted to the common reporting currency, the Bahamian Dollar (BSD), using the end of period exchange rate. Flow figures, namely debt service and disbursements, are converted using exchange rates as of the date of each transaction. Projections are based on exchange rates, specified as at the latest reporting period.

Because of these conversion conventions, and exchange rate fluctuations, period-to period changes in outstanding debt and disbursements do not equal to net flows. These exchange rate influences are indicated in **Table 8**.

DATA CLASSIFICATIONS

The conceptual approach is aligned with best international practices and standards which facilitate comparison with international debt data sets. To enhance understanding of the methodology and concepts, definitions and classification of the debt data are provided in the Glossary.

REFERENCE DATA

Data on exchange rates are obtained from Bloomberg and from the IMF for the SDRs. Fiscal year data on gross domestic product (GDP) are obtained from the quarterly GDP series produced by the Bahamas Statistical Institute and where unavailable, forecasts are generated utilizing IMF projections.

REVISION POLICY

Generally, disbursements, repayments and reconciliation documents are received with a lag, and the debt database is subsequently updated. Any consequential changes in debt data will be reflected in subsequent editions of the PDSB.

PROJECTIONS

Projections are based on disbursed outstanding debt (DOD). The projections commence from the date when the latest quarterly information is available.

PROVISIONAL STATUS

All data are provisional, until audited by the Auditor-General's Office of The Bahamas for the central Government. and audited statements are produced for the Agencies and GBEs. Government's debt data for 2019/20, 2020/21, and 2021/22 are provisional.

ROUNDING

Because of rounding some totals may not agree with the sum of their component parts.

Figure 4: Public Sector External Debt by Creditor (B\$M)
Figure 5: Public Sector Debt by Interest Rate Type (B\$M)
Figure 6: Public Sector Debt Maturity Profile (B\$M)

Public Sector Debt Outstanding

The combined debt stock of the central Government, Agencies and Government Business Enterprises (GBEs)] was an estimated \$11,843.2 million at end-March 2022—equating to a gain of \$207.0 million since end-December 2021 and \$940.1 million over end-March 2021 (see Table 1).

- » Total foreign currency debt, at \$5,351.0 million, constituted 45.2% of the debt stock at end-March 2022—exceeding the respective shares at both end-December 2021 (43.2%) and end-March 2021 (43.5%).
- Bahamian Dollar indebtedness of \$6,492.2 million represented 54.8% of the total, to position below the 56.8% share at end-December 2021 and the 56.5% for end-March 2021.
- Growth in the debt stock between end-March 2022 and end-December 2021 was entirely associated with a \$214.5 million (2.1%) net gain in the central Government' indebtedness. Conversely, outstanding debt of the Agencies and GBEs maintained a net repayment position, posting a further decline of \$7.5 million (0.6%) in the March 2022 quarter.

tral Government loan facility.

Public Sector Debt Service

For the review quarter, public debt service costs aggregated \$925.6 million, comprising \$604.8 million (65.3%) in Bahamian Dollars and \$320.8 million (34.7%) in foreign currency (see Table 2).

» Of the \$816.2 million in principal payments, \$528.5 million (64.8%) was in Bahamian Dollars and the remaining \$287.7 million (35.2%) in foreign currency. The latter was markedly increased over the December 2021 amount, because of the

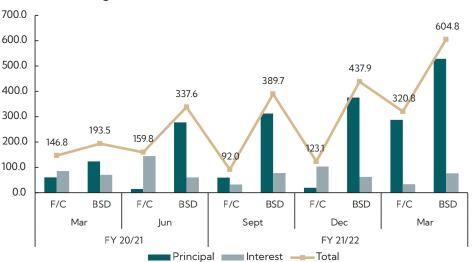

Figure 2: Public Sector Debt Service (B\$M)

Ģ

GLOSSARY

Currency Composition

At end-March 2022, the currency mix of public sector debt was distributed across six (6) currencies, namely, BSD, USD, EUR, CNY, CHF and SDRs (see Table 3).

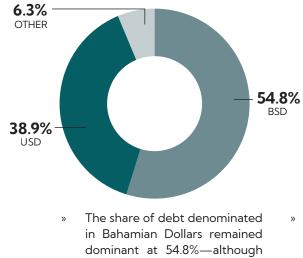

Figure 3: Public Sector Debt by Currency - March 2022 (%)

- The share of debt denominated»Refin Bahamian Dollars remainededdominant at 54.8%—althoughdereceding from the proportionspeheld at both end-Decemberpe2021 (56.7%) and end-Marchaf2021 (56.5%).end
- » Debt contracted in USD represented 38.9% of the overall portfolio, for a gain of 0.4 percentage point and 0.8 percentage point relative to the respective shares held at end-December 2021 and end-March 2021.
- Reflecting new debt contracted by the central Government during the quarter, the EUR exposure increased to 2.3% of the portfolio at end-March 2022, after a steady decline to 0.5% at end-December 2021.
- » The remaining 4.0% in currency shares at end-March 2022 was spread across SDRs (2.1%), CHF (1.3%) and CYN (0.6%) which, except for the CNY, were all below the year-earlier comparative quarters' shares.

2. CENTRAL GOVERNMENT DEBT SUMMARY ANALYSIS

Creditor Composition

Public sector debt maintained a relatively broad holder distribution at end-March 2022, amid the comparatively varied and leading debt activities of the central Government (see Table 4).

» Within the external debt component, the mixed group of private capital market creditors retained a commanding share of the total at 49.5%—although receding since the 57.4% peak held in March 2021. With a composition tilted towards IDB borrowings, the proportion of multilateral debt was 2 percentage points below the previous quarter's level to 22.9% at end-March 2022. Reflecting new borrowings by the central Government, financial institutions' share advanced to 26.4%—a gain of approximately 6.2 percentage points relative to both end-December 2021 and end-March 2021. The proportion held by the single bilateral creditor declined further to 1.2% of the total at end-March 2022.

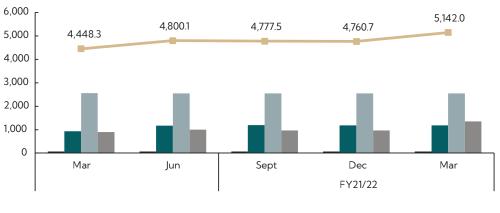

Figure 4: Public Sector External Debt by Creditor (B\$M)

On the domestic side, commercial banks and other financial institutions held a relatively stable 41.5% of the total at end-March 2022 vis-à-vis end-December 2021, although 1.1 percentage points below end-March 2021. The private sector's proportion, at 37.8% at end-March 2022, represented slight gains of 0.6 and 0.2 percentage points above the end-December 2021 and end-March 2021 positions. After a steady quarterly decline to 11.8% at end-December 2021, the public corporation's share firmed slightly to 12.1% at end-March 2022. Reflecting a net repayment during the review quarter, the Central Bank's share of the total declined to 8.0% at end-March 2022 after firming to 9.1% at end-December 2021.

Interest Rate Type

The interest rate profile of the public sector debt was primarily characterized by fixed interest rate contracts, relative to variable interest rate structures (see Table 6).

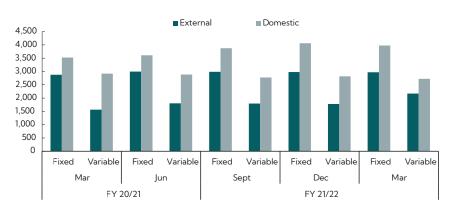

Figure 5: Public Sector Debt by Interest Rate Type (B\$M)

- » Approximately 58.7% of the aggregate public sector indebtedness was contracted at fixed rates, and the remaining 41.3% at variable rates—a proportional pattern observed for both the external and domestic debt components.
- Following relatively stable positions over the past three review quarters, the share of fixed interest rate credit facilities for external liabilities was lowered to 57.9% from 62.6% at end-December. The corresponding firming in the share of variable interest rate debt to 42.1% from 37.4% at end-December, reflected the variable terms se-

cured on the new debt secured by the central Government.

The share of domestic fixed rate liabilities was 0.3 percentage points above the end-December 2021 level, at 59.4% of the total obligations, with an equivalent decline in the share of variable interest rate debt to 40.6%.% at end-March 2021.

ω

GLOSSARY

Public Sector Debt Maturity Profile

The distribution of public debt forecasted redemptions through 2032 continue to be shaped by the dominant portfolio of domestic bonds. These bonds are primarily held by commercial banks, public corporations and institutional investors, and private individuals, who tend to maintain these investments amid the lack of readily available alternatives.

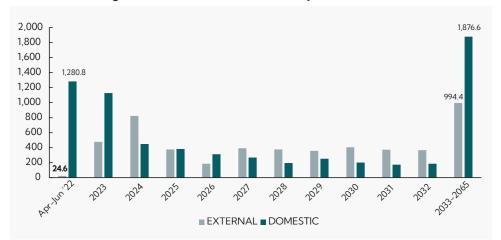

Figure 6: Public Sector Debt Maturity Profile (B\$M)

The debt redemption profile featured a spike in domestic debt in 2023 and in external repayments in 2024 and again between 2027 and 2032, reflecting the scheduled maturity

of various international bond issues. The Government intends to smooth out these spikes through appropriate liability management initiatives.

Ś

GLOSSARY

FY2021/22 Quarter III Public Debt Statistical Bulletin

The central Government's debt stock aggregated \$10,532.4 million at end-March 2022, for respective gains of \$214.5 million from end-December 2021 and \$1,005.8 million from end-March 2021 (see Table 1). Supported by the steady re-covery of the economy from the COVID-19 pandemic, outstanding debt as a share of GDP receded to an estimated 87.5% of GDP at end-March 2022, from a revised 103.4% at end-March 2021 and 92.1% at end-December 2021.

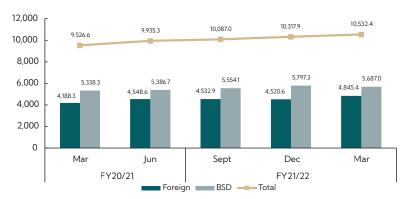

External Debt

- Debt Outstanding: External in-» debtedness, of \$4,732.8 million at end-March 2022, represented 44.9% of the central Government's debt portfolio—a net increase of \$388.5 million from end-December 2021 and the comparatively lower share of 42.1%. This quarterly growth was largely explained by the conclusion of two new loan facilities in March to assist with fiscal year 2021/22 budgetary financing. On March 2, 2022 executed a USD 206.5 million repurchase facility with Goldman Sachs and on March 18 2022, the Government obtained a EUR 207.4 (USD 228.4 million) loan from Deutsche Bank.
- Currency Composition: Reflecting the new debt, the EUR currency share of the debt was higher at 5.7% relative to 1.3% in December 2021. Correspondingly, lower shares were posted for the USD (84.7%), SDRs (5.2%), CHF (3.1%), and CNY (1.3%) denominated facilities.
- Creditor type and source: The external debt creditor profile was relatively stable, with private capital market participants holding \$2,475.0 million (52.3%) of the \$4,732.8 million, followed by multilaterals with \$1,116.0 million (23.6%), financial institutions with \$1,078.9 million in loans (22.8%) and bilateral creditors, at \$62.9 million (1.3%).

Of the \$1,116.0 million in multilateral loans, the share distribution was led by the IDB (57.6%), followed by the IMF (22.6%), the World Bank (9.0%) and the CDB (10.8%). The Export-Import Bank of China, the single bilateral creditor's three loan facilities amounted to \$62.9 million or 1.3% of the total.

Interest Rate Type: Approximately 57.0% of the \$4,732.8 million in external debt obligations were at fixed rate terms, compared with 62.2% in December 2021. The remaining 43.0% at variable interest rates represented a gain of 5.2 percentage points over the end-December 2021 position.

Figure 7: Central Government Debt Stock (B\$M)

m

Domestic Dollar Debt

- » **Debt Outstanding**: At end-March 2022, domestic debt stood at \$5,799.6 million or 55.1% of the central Government's total exposure—for a net decline of \$174.0 million from the preceding quarter. The stock comprised net repayments of internal foreign currency debt to commercial banks (\$63.5 million), Central Bank advances (\$60.0 million), local currency commercial loans (\$29.2 million) and Treasury notes (\$36.1 million); and a net bond issuance (\$14.9 million).
- Creditor Type: Commercial banks were the largest domestic creditors, with loans and holdings of government securities aggregating \$2,449.3 million or 42.2% of the total at end-March 2022. Credit sourced from the private sector via investments in government securities amounted to \$2,297.8 million (39.6%) and debt held by the public corporations of \$521.7 million represented 9.0% of the total. Reflecting a quarterly net reduction of \$87.3 million, the Central Bank's credit position of \$529.7 million equated to 9.1% of

the total domestic debt—down from 10.3% at end-December 2021.

Interest Rate Type: The interest rate pattern of domestic debt continued to reflect the Government's strategic shift to fixed rate liabilities, in an effort to better manage interest rate risk. In this context, the fixed rate component of the domestic debt increased slightly to 59.4% at end-March 2022, with an equivalent decline in the variable rate component to 40.6%.

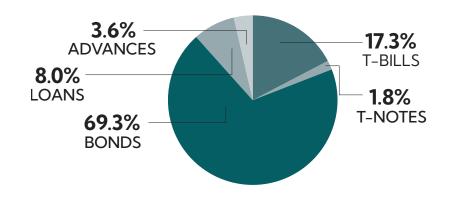

Figure 8: Central Government Bahamian Dollar Debt by Instrument - March 2022 (%)

Ě

Agencies and **GBE Debt** Summary Analysis

4. GOVERNMENT

3. AGENCIES AND GBE DEBT SUMMARY ANALYSIS

Debt obligations of the Agencies and GBEs settled at an estimated \$1,310.8 million at end-March 2022 (see Table 13), as scheduled net redemptions occasioned declines of \$7.5 million decline from end-December 2021 and \$65.7 million from end-March 2021.

- » External debt: Outstanding debt exposure of \$409.2 million equated to 31.2% of aggregate indebtedness at end-March 2022, and was entirely in USD.
- » Domestic debt: Since end-December 2021, these liabilities were lower by \$0.3 million at

\$901.6 million at end-March 2022, of which \$805.2 million was in Bahamian Dollars and \$96.4 million in foreign currency. The latter, when combined with the external debt, brought foreign currency indebtedness to \$505.6 million, for a slightly lower 38.6% of the overall portfolio at end-March 2022 relative to the 38.9% at end-December 2021.

» Guaranteed Debt: At end-March 2022, an estimated \$396.0 million (30.2%) of the Agency and GBE debt was guaranteed by the Government. Given the minor decline relative to end-December 2021, the proportions for both the Bahamian dollar and foreign currency denominated debt were stable at 84.2% and 15.8%, respectively.

Debt owed to the Government: Agencies and GBEs' bilateral loans from the central Government stood unchanged at \$40.8 million at end-March 2022.

Government Guaranteed Debt

21

»

Government guaranteed debt totaled \$398.2 million at end-March 2022, explained by scheduled loan run-offs of \$1.0 million (0.3%) and \$24.3 million (5.8%) from end-December 2021 and end-March 2021, respectively.

22

» Entity Composition: Approximately 99.4% or \$396.0 million of guaranteed debt was for the Agencies and GBEs, with the remaining \$2.2 million (0.6%) being private sector loans of financial sector entities with Government guarantees.

- » Currency Composition: Guaranteed debt was primarily denominated in Bahamian Dollars (\$335.7 million or 84.3%) and the remaining \$62.5 million (15.7%) in USD.
- Holder and Currency Categories: The outstanding included two IDB USD facilities aggregating \$62.5 million, and the \$335.7 million in BSD guaranteed debt was owed to public corporations (52.6%), private sector (26.7%), commercial banks (19.2%) and the Central Bank (1.5%).

Refinancing Risk		Total	25.84	23.03
	Debt maturing in 1 Year as % of total debt	External	9.08	7.73
		Internal	38.03	35.49
	ATR (Years)		4.90	4.7
Interest Rate Risk	Debt refixing in 1 Year (as % of total debt)		54.98	58.16
	Fixed rate debt (% of total debt)		60.38	58.3
Forex Risk	Foreign currency debt (as % of total debt)		43.80	46.00

Figure 9: Central Government Debt Portfolio Cost and Risk Indicators

Weighted Average Interest Rate (WAIR): Based on the WAIR, the cost of the existing debt was relatively stable at 4.91% at end-March 2021 from the previous guarter end, although with notable shifts in the components. An unchanged WAIR of 7.15% on the external fixed rate bonds was tempered by the lower WAIR on external loans of 3.07%--although it was 0.41 percentage points above the previous quarter's rate. Internally, government bonds and loans carried relatively stable WAIRs of approximately 4.66% and 4.89%, respectively. Interest payments of \$93.9

million for the third quarter of

FY2021/22 constituted an esti-

mated 13.5% of Government rev-

enue and 0.8% of GDP.

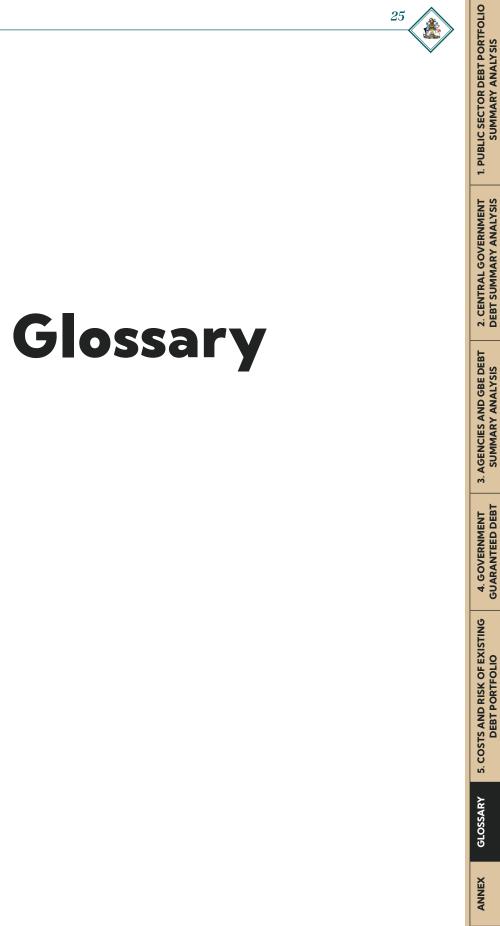

- » Average Time to Re-fixing (ATR): The weighted average time until all the principal payments in the debt portfolio become subject to a new interest rate was lower at 4.75 years at end-March 2022, compared with 4.90 years at end-December 2022; and 58.2% of the total debt was subject to a change in interest rate within 1 year, up from 55.0% at end-December 2021.
- Refinancing/Rollover Risk: The average time to maturity (ATM) was 6.8 years at end-March 2022. An average 23.0% of the portfolio was coming due in 1 year, given the impact of the short-term nature of Treasury bills and notes which extended the percentage of the domestic

debt maturing in 1 year to a high of 35.5%. By comparison, only 7.7% of the external debt is due to mature within 1 year.

Foreign Currency Risk: The foreign exchange risk inherent in the debt portfolio continues to be mitigated as 84.7% of foreign debt is held in USD, to which the BSD is pegged. The exposure linked to the SDR, the EUR and the CHF loans remained comparatively small. Total foreign currency debt as a proportion of total Government debt was 46.0% at end-March 2022.

24

ω

Glossary

Agencies	These are state-owned enterprises that are not ministries, departments or Government Business Enterprises.
Amortization	The payment of principal and interest on a loan, on an on- going basis.
Average Time to Maturity (ATM)	A measure of the weighted average time to maturity of all principal repayments in the portfolio. A longer ATM implies lower refinancing risk, and vice versa.
Average Time to Refixing (ATR)	A measure of the weighted average time until all princi- pal repayments in the debt portfolio become subject to a new interest rate. The longer the period, the longer the interest rate exposure.
Bilateral agencies	A government agency or non-profit organization that re- ceives funding from its home country's government.
Bilateral debt	Debt contracted from sovereign countries.
Bonds	Debt securities that give holders an unconditional right to fixed income or contractually determined payments on a specified date or dates.
Bilateral Debt	Debt contracted from other sovereign countries.
Bilateral Creditor	In the context of external debt, these creditors include governments and their agencies, autonomous public bodies or official export credit agencies.
Bullet repayment	The repayment of principal in a single payment at the ma- turity of the debt.
Capitalization of Interest	Interest charged but not paid becomes part of the loan principal amount. It increases the amount of loan.
Contingent liability	Obligations that do not arise unless a discrete event(s) oc- curs in the future.
Concessional loans	Loans extended on terms substantially more generous than market loans. Concessionality is achieved either through interest rates below those available on the mar- ket or by longer grace periods, or a combination of these. Concessional loans typically have long grace periods.
Coupon	The annual interest rate paid on a bond expressed as a percentage of the face value.
Debt refinancing	Involves the replacement of an existing debt instrument or instruments, including any arrears, with a new debt in- strument or instruments.
Debt to GDP ratio	Ratio of a county's debt to its Gross Domestic Product (GDP).
Debt to Revenue Ratio	Measures the burden of debt on the government's rev- enue.

Glossary cont'd

Disbursed and Outstanding Debt	Debt which has been disbursed and which is due to be re- paid.
Domestic Debt	Debt liabilities owed by residents to residents of the same economy.
Debt Service	Payments in respect of both principal and interest, and other charges, which are required to be made through the life of the debt.
External Debt	Debt owed to a non-resident individual or institution.
Government Business Enterprises	A n entity owned or controlled by the Government that provided services in the market or undertakes commer- cial activities.
Gross Domestic Product	The market value of all final goods and services produced within a country in a given period. The GDP is determined using data for production, expenditures, or income, and is presented in current or constant prices.
Grace Period	The period from the date of the signature of the loan or the issue of the financial instrument to the first repayment of principal.
Interest Payment	The amount paid periodically over a period to a lender as compensation for the use of the lender's capital.
Interest Rate	The cost or price of borrowing or the gain from lending, normally expressed as an annual percentage.
Issue Price	The price at which investors buy the debt securities when first issued.
LIBOR	The London Inter Bank Offered Rate is an indicative aver- age interest rate at which a selection of banks (the panel banks) are prepared to lend one another unsecured funds on the London money market.
Long-Term Debt	Debt with maturities ranging from 11 years and above.
Maturity	Refers to the time until the debt is extinguished according to the contract between the debtor and the creditor.
Multilateral Agencies	Include international institutions, e.g., the Internation- al Bank for Reconstruction and Development ("IBRD" or "World Bank"), Inter-American Development Bank (IDB), the European Union (EU), the European Investment Bank (EIB).
Principal Repayment	Payment made towards reducing disbursed outstanding debt.
Maturity	The remaining time until the expiration or the repayment of an instrument.

Glossary cont'd

Medium-Term Debt	Debt with maturities ranging from 2 to 10 years.
Multilateral Debt	Debt contracted from multilateral institutions such as World Bank, IMF and development banks such as the Af- rican Development Bank (AfDB).
Original Maturity	The time from when the financial asset/liability was creat- ed to its final maturity
Public Debt	The total public (external and domestic) debt obligations of a country.
Refinancing Risk	The possibility that a borrower cannot refinance its debt by borrowing to repay existing debt.
Remaining Maturity	The time until outstanding debt payments fall due.
SDRs	International reserve assets created by the International Monetary Fund and allocated to its members to supple- ment reserve assets.
Short-Term Debt	Debt with maturity of one year or less. Maturity can be defined either on an original or remaining basis.
Spread	A percentage to be added to some defined base interest rate, such as LIBOR, to determine the rate of interest to be used for a loan.
Stock of Debt	The amount of debt outstanding at a given time.
Treasury Bills	Negotiable securities issued by the government. In gen- eral, these are short-term obligations issued with maturity of one year or less. They are traded on a discount basis
Undisbursed debt	Funds committed by the creditor but not yet drawn by the borrower
Yield-to-Maturity	The rate at which the present value of future interest and principal payments, i.e., all future cash flows from the bond, equal the price of the bond.
Weighted Average Interest Rate (WAIR)	The weighted average level of interest rates on outstand- ing debts. The weight to be used is determined by the val- ue of the debt as a percentage of the total outstanding amount.
Yield	The return on an investment or interest received from holding a particular security.
Yield Curve	A graph that shows the relationship between yield and maturity computed across all government securities (or other securities)
